Ian Bayne

Contact (m): please email request **(email):** ian.bayne81series@gmail.com
Location: Townsville, North Queensland, Australia
Web development portfolio: ianbayne.netlify.com

I have spent the past 18 years within the transport and logistics industry outlined within my resume. Although I have found this industry previously rewarding, my passion for web development and furthering my skills and experience has driven me to seek full time employment within a web developer environment. My web development portfolio is a compilation of my personal projects completed also with access to the code written to achieve all output displayed. My projects completed are written using HTML, CSS and JavaScript programming languages with the support of Visual Studio Code and node.js programs. I also have experience working with babel.js, node dependencies and webpack configured files. I would love to expand into further frameworks available in the industry and obtain the opportunity to contribute and learn from a successful team of web developers. I am available for immediate start in the Townsville region and or for remote location work including flexible 24/7 availability operating from a Windows operating system.

Employment history

2015 – 2018 – Nick Scali Furniture – Warehouse Manager

Daily management of operations and compliance involving large customer base. Actively overseeing warehouse operations, maintaining daily communication with customer base, managing existing stock and completing stocktakes when required. Utilising an internal company warehouse database to manage flow of inward and outward stock, invoices, product locations and product movements.

2008 – 2015 – Toll Group - Operations Supervisor

Reporting directly to NQ Line Haul Equipment Manager, this role has 22 direct reports (Line Haul Drivers) and is responsible for the scheduling of multi-combination road train operations throughout Nth Qld, the vehicle maintenance scheduling, compliance, safety and training as well as management of employee's and their compliance, rostering and administration.

2006 – 2008 – Toll Group - Forklift Operator / Heavy Vehicle Operator

Working in a fast paced warehouse environment loading and unloading both linehaul trailers and rigid vehicles. Ensuring accuracy to processes, procedures and organisational compliance whilst ensuring a high regard to housekeeping and safe work practices.

Responsible for picking up and delivering goods with both rigid and heavy combination vehicles, whilst ensuring a high regard to customer service and organisational reputation.

2000 – 2005 – Australian Defence Force (Regular Army) – Cargo Specialist

Supported defence combat units in the movement of cargo and personnel. Undertook various duties in loading and unloading all modes of transport, including amphibious beach landings, marine crane operations, dogging operations, off road fork lift operations and heavy combination vehicle operations in the movement of cargo. In this time experienced deployments to Iraq, Soloman Islands and Indonesia. Boarding party operations were also conducted on these deployments inclusive of various weapons training and helicopter insertions via method of fast roping.
